

VisiTalk — Every Child's Voice

Team Orange · Software Project

Meet Team Orange

Our dedicated team consists of diverse roles:

Product Owner, Full-stack Developer, Backend/Data Specialist, Frontend/UX Designer, and Scrum Master/QA, all committed to creating impactful solutions for autistic children's communication needs.

Communication Barriers and VisiTalk Solution

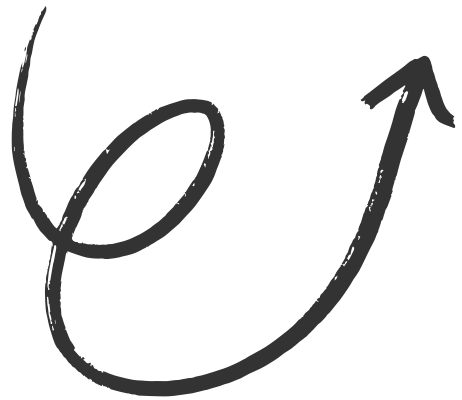

MVP — What We Shipped

- Module A · PECS Builder — big card grid + drag-to-build a sentence
- Module B · Visual Schedule — step-by-step schedule + highlight current step
- Module C · Behaviour Logger — emotional tracking + auto weekly trend report

Understanding Our User Personas

Kids and their parents

Agile Management with Scrum

Utilizing Jira for Project Tracking

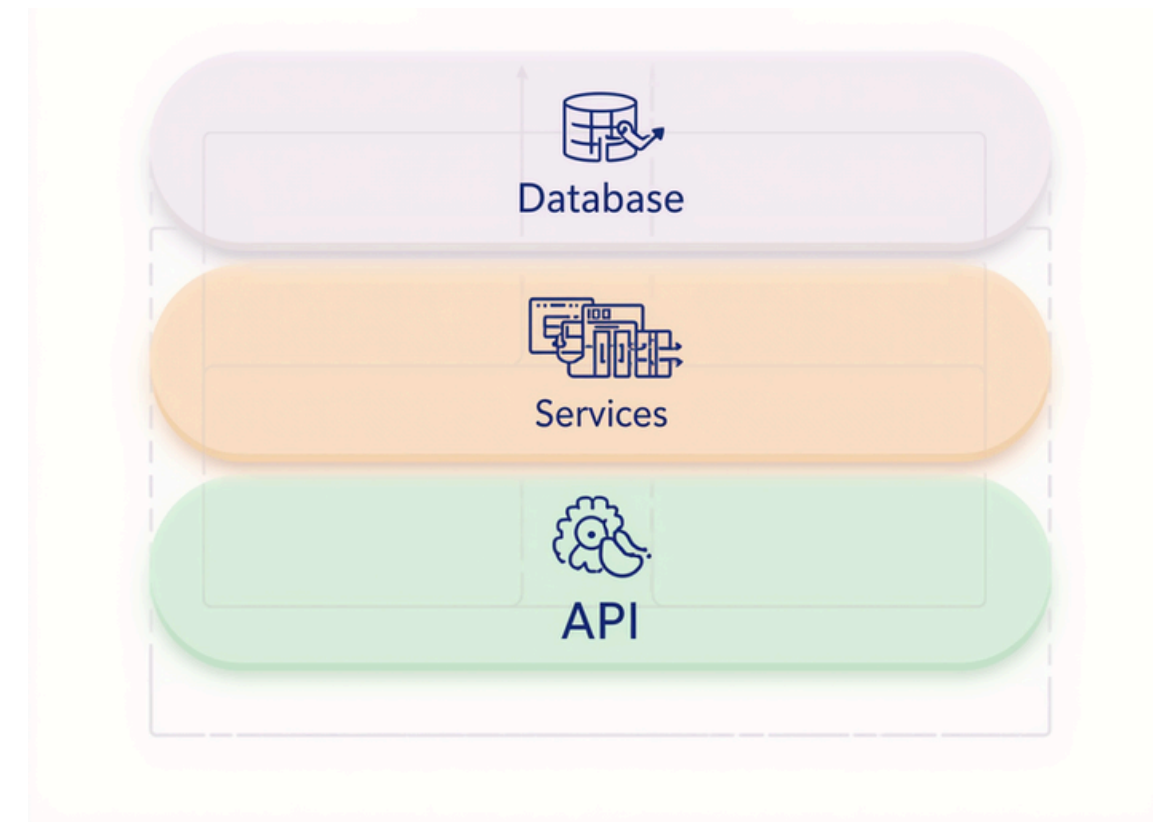

We implemented Scrum methodology with Jira to ensure efficient project management, leveraging planning poker for estimation and maintaining a well-defined backlog for streamlined workflows.

Clean Code Principles

Ensuring Quality and Maintainability

Our architecture focuses on layered design, reusability, and security, enhancing performance while maintaining a clean, efficient codebase that is easy to manage and adapt.

Thank You
